3-1 Journal: Marketing with ePortfolios and Artifact Update

Part 1:

1. How might you use an ePortfolio for the benefit of self-promotion?
 - An ePortfolio is a great way to showcase projects you have done and to get feedback from others. Many developers use an ePortfolio as a resume to show to potential employers and customers.
2. How might you mitigate risks while maximizing the marketing potential of the ePortfolio?
 - Mitigating the risks involves sanitizing any sensitive data that may be contained in the artifacts you upload. Generally, I have replaced any secrets or URL's with a bracket that looks like: <file_path> or <url> to show the intended values without revealing sensitive information. It is also important to ensure that any work you put on the internet does not violate any NDA's with former employers or customers.
3. Describe possible downsides or risks—for instance, the risks of posting intellectual property online for public consumption.
 - A common risk is IP ownership and violations of NDA's. Posting IP online can open it up to being stolen and copied. You could be violating an NDA with a former employer by posting something to the web if you aren't careful.
4. Which course outcomes have you achieved so far, and which ones remain?
 - Outcomes 4, 5 and 3 have been achieved by completing the first artifact.

Part 2:

Status Checkpoints for All Categories

Checkpoint	Software Design and Engineering	Algorithms and Data Structures	Databases
Name of Artifact Used	Appointment (CS-320)	Pending	Pending
Status of Initial Enhancement	Complete	Pending	Pending
Submission Status	Submitted	Pending	Pending

Status of Final Enhancement	Complete	Pending	Pending
Uploaded to ePortfolio	Pending	Pending	Pending
Status of Finalized ePortfolio	Pending	Pending	Pending
